I hereby certify that the information submitted is of the animal described on this application. I understand that only normal results will be released to the public unless the initials of a registered owner appear in the authorization box below which permits the OFA to release abnormal results to the public.

Signature of owner or authorized representative

### Authorization to Release Abnormal Results

I hereby authorize the OFA to release the results of its evaluation of the animal described on this application to the public if the results are abnormal (initials of registered owner).

### Patellar Examination Results

#### 1. Normal

right       left

#### 2. Patellar Luxation

<input type="checkbox"/> bilateral	<input type="checkbox"/> right	<input type="checkbox"/> left
<input type="checkbox"/> unilateral:	<input type="checkbox"/> medial	<input type="checkbox"/> lateral
<input type="checkbox"/> luxated:	<input type="checkbox"/> intermittent	<input type="checkbox"/> permanent
<i>luxation is:</i>	<input type="checkbox"/> < 2 months	<input type="checkbox"/> 2-6 months
<i>age of onset:</i>	<input type="checkbox"/> 6-12 months	<input type="checkbox"/> > 12 months

#### 3. Classification of luxation

- Grade 1**—The patella easily luxates manually at full extension of the stifle joint, but returns to the trochlea when released.
- Grade 2**—There is frequent patellar luxation which, in some cases becomes more or less permanent.
- Grade 3**—The patella is permanently luxated with torsion of the tibia and deviation of the tibial crest of between 30 degrees and 50 degrees from the cranial/caudal plane.
- Grade 4**—The tibia is medially twisted and the tibial crest may show further deviation medially with the result that it lies 50 degrees to 90 degrees from the cranial/caudal plane.

I certify that the examination was performed according to the OFA procedure.

I DID verify tattoo/microchip on this dog       I DID NOT verify tattoo/microchip on this dog
